

AMENDMENTS TO THE SPECIFICATION

Please amend the paragraph on page 7, beginning on line 26 as follows to correct typographical errors:

The ODT resistance control circuit 110 according to the present invention is constructed to respectively provide a PU (push-up) code and a PD (~~push~~pull-down) code to a push-up decoder and a pull-down decoder of an interface circuit 120 that ~~is~~-performs the on-DRAM termination operation.
